

Big Meadow Conservation District Pershing County, Nevada

Big Meadows CD has sponsored multiple students to attend the Society for Range Management (SRM) Rangelandcamp each year.

Working with NRCS and local schools to promote the understanding of how trees grow. NRCS demonstrates the relationship between trees, soil, water, animals, and air. The kids get to plant a bare-root tree or shrub into a recycled container and that it home.

The CD regularly participates in the Nevada Association of Conservation Districts (NACD) poster contest. Teachers are encouraged to include natural resource information into their regular curriculum.

Working with state and local partners to help with fire rehab across private landscapes.

The CD provides scholarship money to local students who are pursuing studies in natural resources, agriculture, and related fields.
