

## RESTORATION ACTIVITIES

**2015 Walker River Sediment Removal Project-355,000 tons of sediment removed from the river bed to help prevent flooding. . In collaboration with the City of Yerington, Lyon County, Walker River Irrigation District, and the Nevada Division of Water Resources. The project cost \$397,500, using money provided by the entities above. Mason Valley CD provided critical permitting, oversight, and administration of the project.**

**.Aerial and hand application of herbicides to control invasive weeds such as Medusahead**

**Removal of invasive Pinyon/Juniper and Tamarisk trees to improve habitat for wildlife**

**Marking fences for sage grouse, especially near meadows, reduces the number of birds hitting those fences.**

## ENVIRONMENTAL EDUCATION MAKING A DIFFERENCE

## MONITORING

**Monitoring of projects is an essential component of restoration activities**
